

SECRET

CLAIMS

1 (amended). A portable cellular telephone, having a first part comprising interface means for performing subscriber interface functions and a second part comprising transceiver means for
5 transmitting and receiving over a telecommunications cellular telephone network, said first part and second part being releasably connected to each other, said first part and second part being in bidirectional communication with each other when separated, said first part further comprising means for wireless communication with
10 a further telecommunications network or with a telecommunication station.

2 (amended). A portable cellular telephone, according to claim 1, wherein said means for wireless communication comprises a radio.

15 3 (amended). A portable cellular telephone, according to claim 2, wherein when said parts are connected, direct communication takes place therebetween.

4 (amended). A portable cellular telephone, according to claim 3, wherein the second part further comprises a connector for
20 the reception and transmission of digital data through the cellular network.

5 (amended). A portable cellular telephone, according to claim 1, wherein the means for wireless communication comprises an infrared connection.

6 (amended). A portable cellular telephone, according to
claim 1, wherein said infrared connection puts the first part in
communication with a computer.

7 (amended). A portable cellular telephone, according to
5 claim 1, wherein said means for wireless communication comprises a
short distance connection to the station or network.

8 (amended). A portable cellular telephone, according to
claim 1, wherein said means for wireless communication comprises a
standard radio link utilized for bidirectional communication with
10 the second part.

9 (amended). A portable cellular telephone, according to
claim 1, wherein said first part comprises a connector for a
SmartCard or Multimedia Card.

10 (amended). A portable cellular telephone, according to
15 claim 1, wherein said means for performing subscriber interface
functions comprises a keyboard, a display and means for performing
audio functions.

11 (amended). A portable cellular telephone, according to
claim 1, comprising means for performing FM radio functions and/or
20 MP3 audio decoder functions and/or Voice Memo and Dialing functions
and/or Web Browser functions.

12 (amended). A communication system with telematic services
supplied by telecommunication stations and/or networks, which
provides utilization of subscriber terminals for information

exchange with said telecommunication stations or networks,
comprising a subscriber terminal which includes a portable cellular
telephone having a first part comprising interface means for
performing subscriber interface functions and a second part
5 comprising transceiver means for transmitting and receiving over a
telecommunications cellular telephone network, said first part and
second part being releasably connected to each other, said first
part and second part being in bidirectional communication with each
other when separated, said first part further comprising means for
10 wireless communication with a further telecommunications network or
with a telecommunication station, said communications system
further comprising means for enabling at least one of the
telecommunication stations or networks to communicate directly and
wireless with said means for wireless communication.

15 13 (amended). A communication system with telematic services
supplied by telecommunication stations and/or networks, according
to claim 12, wherein the telecommunication station or
telecommunication network is a company internal communication
station or network and/or a station or network for authorized
20 customers.

14 (amended). A communication system with telematic services
supplied by telecommunication stations and/or networks, according
to claim 13, wherein said company internal telecommunication

station or network and/or station or network for authorized customers is a bank services network.

15 (amended). A communication system with telematic services supplied by telecommunication stations and/or networks, according
5 to claim 12, wherein said telecommunication station or network is an internal household communication station or network.
